

Feral Friendly Private Veterinary Practices

The following veterinary clinics have indicated that they do spay neuters on ferals and that their basic spay charges are between \$50 and \$100. Neuters generally run \$12 to \$30 less. They may or may not require other tests and/or vaccinations in addition to sterilization. This will increase the charges so be certain that you understand exactly how much the total cost will be prior to making an appointment. Veterinarians generally charge more for pregnant animals and those animals in heat.
