

I Found Kittens!

SIGNS OF ILLNESS IN KITTENS:

Dirty, crusty eyes/nose, skinny, etc.
Visit kittenlady.org/casa for more info

DO THE KITTENS APPEAR SICK OR INJURED?

YES: Call 311 or our Helpline at 210-877-9067
NO: Estimate their age

DO YOU SEE THEIR NEST OR HIDING PLACE?

YES: Leave the kittens where they are or gently return them to their nest. Wait at a distance and observe for 6-8 hours to see if mom returns. *** SHE IS THEIR BEST CHANCE AT SURVIVAL.**

NO: If in a dangerous spot, move the kittens to a safe place nearby and observe at a distance for 6-8 hours to see if mom returns.**

CAN YOU FOSTER THE KITTENS?

YES: Great! Apply to foster them with SAFCC sponsorship at www.sanantonioperalcats.org/adoption/#fosterappeal and then learn about age-appropriate kitten care at www.kittenlady.org/kitten-care

NO: Go to sanantonioperalcats.org/resources for TNR information or contact our Helpline at: info@sanantonioperalcats.org

DID MOM RETURN?

YES: Great! Leave them alone and provide mom with food/water. Go to www.sanantonioperalcats.org/resources for TNR information in preparation for when the kittens are 8+ weeks old.

NO: Move them to a warm/safe location and call 311 or our Helpline at 210-877-9067. See www.kittenlady.org/videos for care info.

*Mom could be out hunting for food and a nervous mother cat may not return if people are present. You can sprinkle a ring of flour around the kittens and check later for mom's footprints.

**Someone else may also be observing them and may have placed them in a box to await mom's return. DO NOT assume kittens in a box are orphaned.
